Tools	:	Eclipse.
Client	:	Winshuttle.
URL in Google Play	:	

<https://play.google.com/store/apps/details?id=com.winshuttle&hl=en>

Description:

Winshuttle enables you to build and adapt Excel and SharePoint-based interactive forms and workflows for SAP without programming. Winshuttle software lets organisations streamline their SAP operations in critical business areas such as financial accounting and master data without compromising on security and control.

The Winshuttle Mobile app provides a unique way to interact with available SAP-based business processes through a touch-based Android device.

This app is intended for users of the Winshuttle Foundation product. With this app, any licensed Winshuttle Foundation users can view, review and approve tasks assigned to them, along with all of the relevant SAP data in the forms associated with each task. Approving or rejecting a task moves the workflow process along in SharePoint, including any follow-up activities that involve posting data into SAP.

Roles and Responsibilities:

- Interact with Management to understand the requirements and clarifying the doubts.
- Involved in collecting the requirements from Client.
- Worked for the user requirements and prepared the software functional activities.
- Participated weekly in Scrum meets to discuss different issues in the project.
- Coordinated with co team members to develop high level business and technical Documents.
